

## Myshroom Speech

The Quantum Health Discoveries Research Institute Inc. is a nonprofit. The institute has researched and developed a superior mushroom food made from proprietary hybrid strains of medicinal mushrooms. It has been commercialized and sold under the brand name Myshroom® worldwide since 2011. The web addresses are at [www.quanthealth.org](http://www.quanthealth.org), [www.mycoldiscovery.com](http://www.mycoldiscovery.com) and [myshroom.com](http://myshroom.com)

An important statement for us to make is. Does anyone here have a debilitating disease like cancer or know someone who does, then please listen closely to all that we have to share with you today.

The superior nutrition of this food far exceeds the nutrition of any other food on Earth. It provides the chemistry to support:

- Provides superior nutrition that accelerates cell communication.
- Chemistry supports the immune and nervous systems.
- Supports balancing of the immune system so it is not overactive with all of those auto immune diseases out there.
- The fungi produce natural antibiotic molecules that has shown they are far superior to many and support antibiotics.
- Causes the apoptosis (cell death) of various gram-negative, some gram-positive bacteria and parasites in the body.
- Provides nutritional support to your red blood cells so they can

utilize more oxygen for your cells, the result is you feel more energy and endurance.

- Pieces of various molecules from the mushroom chemistry (beta glucans and various polysaccharides and poly amino acids) attach themselves to the receptors of mutated, deformed, sick, benign and cancer tumor cells or lesions. So, they can be seen as foreign bodies, so your immune system will see them and consume them in most cases. In other words, removing the cloaking device of these cells to your immune system.
- There is a noticeable increase in redox molecules (cell-to-cell communication) so your immune system and stem cells can work more aggressively, and thoroughly to fight and repair tissue or grow new cells to take the replacement of the mutated or cancer cells that your immune system consumes.
- The product is completely safe to consume by all people, even if you are on medications, and by all ages. It is even safe for those allergic to penicillin or other antibiotics or food allergies. It is safe for pregnant women. You cannot overdose on the products.
- By consuming 32 grams or 12 level teaspoons a day or more with your food or beverage this will give your body what it needs. You can add it as an ingredient for a smoothie or beverage. We have a sample recipe for smoothies.
- All the research started back in 1971. The hybrid strains were developed in university laboratories.
- The product is grown in pharmaceutical grade sterile

environments so there is no contamination from bacteria or viruses or toxins in the air or water.

- The company is registered with the FDA and has an FDA number.
- It was observed in the research that when transgenic mice and rats with tumors were fed food that incorporated the hybrid mushroom strains, their tumors would shrink and go away with no other drug or treatment.
- The teams from the universities pursued research to find the mechanisms and pathways, to see what molecules in the chemistry were causing this positive outcome. It was not known it would work with humans until a friend of the founder with stage four lung and brain cancer had only a month to live.
- When they had this man with stage four lung and brain cancer consume the myshroom product, he was cancer free in 27 days. That then led the teams to beta test and research it with cancer patients in Europe, the US and Asia over two years and it showed that there was a better than 90% positive outcomes with all types of cancer to include pancreatic and brain cancers. It shows there is an increase in cell communication to support the immune system and stem cell proliferation.
- This is not a cure for anything; it is a superior nutritious food that provides the missing nutrition that your body needs so it operates more effectively as nature intended our bodies to function.
- Over the past 15 years more research has shown by several

university studies that when your immune system is balanced that you may overcome Alzheimer, Dementia, Schizophrenia, bipolar disorder, many neurological diseases, and, or addictions to drugs. This is not in a published journal document at this time.

- It has been observed that patients with Huntington's, Parkinson's and MS have improved and some have overcome their diseases when adding the Immune product to their diet.
- The superior nutrition makes this the best food to serve for those with life threatening diseases and famine.
- These statements have not been approved by the FDA and this is a food and accepted as a food by the FDA.
- We schedule podcasts that you can attend to hear more and to answer your questions. The dates of our podcast will be on the handout given to you. There is a Q&A on the [mycoldiscovery.com](http://mycoldiscovery.com) web site called Questions and Answers or Handbook.
